ED Provider Note

ED Provider Notes by Johnston, Glennon, PA-C at 3/26/2025 1918

Patient Seen in: Edward Emergency Department In Plainfield

History

Chief Complaint

Patient presents with

- Neck Pain

03/26/2025 - ED in Edward Emergency Department in Plainfield (continued)**ED Provider Note (continued)**

Stated Complaint: neck pain x1 week. pt was in mvc in december. states she thinks she has a pinch*

Subjective:

HPI

26-year-old female. Patient explains that she was involved in a motor vehicle accident this past December. Received a CT of the C-spine at time of incident. And followed up with her neurologist and underwent MRI of the cervical spine. Results listed in MDM. Patient explains that she has had continued pain since the accident. There was an attempt to order physical therapy and trigger point injections but she is having issues with her insurance. She tried to intervene with a chiropractor but feels the adjustments have worsened her situation. This past 7 days, her symptoms have been more significant. No recent adjustments. No new thunderclap headache, focal deficits or dizziness. Symptoms worse to the left neck with occasional radiation into the left upper extremity. She is currently utilizing gabapentin, NSAIDs and Flexeril with minimal relief.

Objective:

Past Medical History:

- Anxiety
- Depression
- HPV in female
- HSV-2 infection
- Migraines
- PTSD (post-traumatic stress disorder)

History reviewed. No pertinent surgical history.

Social History

Socioeconomic History

- Marital status: Single

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Vaping Use

- Vaping status: Never Used

Substance and Sexual Activity

- Alcohol use: Not Currently
- Drug use: Not Currently

Physical Exam

Gen: Well appearing, well groomed, alert and aware x 3

Neck: Generalized paracervical muscular tenderness to palpation, left greater than right. No crepitus.

Extremities: Full active range of motion of the bilateral upper extremity

Neuro: Cranial nerves intact, Normal Gait.

ED Course

Labs Reviewed - No data to display

03/26/2025 - ED in Edward Emergency Department in Plainfield (continued)**ED Provider Note (continued)****MDM**

We will involve the case manager to try and assist with follow-up, PT and trigger point injections.

Patient's previous imaging was reviewed.

CT CERVICAL 12/9/24

FINDINGS: No evidence of acute displaced fracture or dislocation. Normal mineralization.

12/17/24 MRI Cervical:

CONCLUSION:

1. Mild degenerative disc disease at the C4-5 and C5-6 levels. No significant central canal or neural foraminal stenosis throughout the cervical spine.
2. Small caliber, contour, and signal intensity of the cervical spinal cord.

Patient received intramuscular injection of Solu-Medrol and Toradol. Will continue these medications for the next 5 days. We will switch her Flexeril to Valium. We will try to arrange follow-up for the patient patient placed in a sling. Also recommend over-the-counter soft collar.

Medical Decision Making**Disposition and Plan**

Clinical Impression:

1. Neck pain

Disposition:

There is no disposition on file for this visit.

There is no disposition time on file for this visit.

Follow-up:

No follow-up provider specified.

Clinical Notes
Discharge Instructions

Johnston, Glennon, PA-C at 3/26/2025 2013

Purchase over-the-counter soft collar. Wear sling. Ice the areas. Recommend taking the prednisone in the morning with breakfast. Take Toradol in the early afternoon, late afternoon and evening with food. Muscle relaxant as needed. Be cautious as this will cause sedation. Continue to pursue follow-up for trigger point injections and physical therapy.

03/26/2025 - ED in Edward Emergency Department in Plainfield (continued)

After Visit Summary (continued)

Your blood pressure today was mildly elevated; we recommend that you follow up with your primary care physician.

3/26/2025 6:43 PM	
Blood Pressure	
BP	140/79

Disclosure

You were examined and treated today on an urgent basis only. This was not a substitute for ongoing medical care. Often, one Emergency Department visit does not uncover every injury or illness. If you have been referred to your personal physician, a primary care physician or a specialty physician for a follow-up visit, please tell this physician about any new or ongoing problems.

Insurance plans vary and the physician(s) referred by the Emergency Department may not be covered by your plan. Please contact your insurance company to determine coverage and benefits available for follow-up care and referrals.

If you need additional assistance selecting a physician, contact the Endeavor Health Physician Referral and Class Registration Line at (630) 527-6363 or find a doctor online by visiting www.eehealth.org. Click on "Find A Doctor"

If you have behavioral health concerns or thoughts of harming yourself, contact the Linden Oaks Hospital Assessment and Referral Center at 630-305-5027. Staff are available 24 hours a day, 7 days a week.

If you have difficulty scheduling your follow-up appointment as directed, please call our Case Manager

Si tiene problemas para programar una cita de seguimiento según lo indicado, llame al Encargado de Caso

Edward Hospital Case Manager 630-646-8896
Elmhurst Hospital Case Manager 331-221-0198

If you have been prescribed any medication(s), please fill your prescription right away and begin taking the medication(s) as directed. If you have any difficulty obtaining the medication(s) prescribed from your Emergency Department visit, please call the Case Manager number listed above.

Our Emergency Department is dedicated to providing you with excellent care and a patient-centered experience. Feedback is appreciated, and can be communicated via the electronic (email/text) assessment survey that you will receive within 24 hours of your visit. Additionally, the Patient Experience Call Line is available 24 hours a day/7 days a week.

The EEHealth Patient Experience Call Line 331-221-1115

If there is any change or worsening of your condition, call your primary care physician or return to the Emergency Department.
