### **ED Provider Note**

## ED Provider Notes by Ahmed, Saroosh, MD at 12/9/2024 2259

Patient Seen in: Edward Hospital Emergency Department

## History

Chief Complaint
Patient presents with

• Trauma

Stated Complaint: mvc, neck and back pain, denies loc,

Subjective:

HPI

Patient is 26-year-old female involved in MVC. She was rear-ended at a stoplight. She was jerked forward. Incident happened about 6 hours ago. Denies any head trauma LOC. She was restrained airbags not deployed she was ambulatory at the scene. She went home and then brought to the ED by her friend. Denies any loss of consciousness. But does have some headache and neck pain. No chest back abdominal pain. She had some tingling in the fingertips but no weakness in the upper or lower extremities or bowel bladder changes. No other injury or other complaints.

Objective:

Past Medical History:

Anxiety

### CT SPINE CERVICAL (CPT=72125) [534619000]

Ordering provider: Ahmed, Saroosh, MD 12/09/24 2258

Resulted by: Stromberg, Leroy, MD
Performed: 12/09/24 2306 - 12/09/24 2312

Resulting lab: EDWARD ELMHURST IMAGING

Narrative:

PROCEDURE: CT SPINE CERVICAL (CPT=72125)

COMPARISON: None.

INDICATIONS: mvc, neck and back pain, denies loc,

TECHNIQUE: Noncontrast CT scanning of the cervical spine is performed from the skull base through C7. Multiplanar reconstructions are generated. Dose reduction techniques were used. Dose information is transmitted to the ACR (American College of

Radiology) NRDR (National Radiology Data Registry) which includes the Dose Index Registry.

PATIENT STATED HISTORY: (As transcribed by Technologist) Patient with neck pain post motor vehicle accident.

FINDINGS: No evidence of acute displaced fracture or dislocation. Normal mineralization.

Impression:

CONCLUSION: No evidence of acute displaced fracture or dislocation.

LOCATION: Edward

Dictated by (CST): Stromberg, LeRoy, MD on 12/10/2024 at 0:47 AM Finalized by (CST): Stromberg, LeRoy, MD on 12/10/2024 at 0:51 AM

### Disclosure

You were examined and treated today on an urgent basis only. This was not a substitute for ongoing medical care. Often, one Emergency Department visit does not uncover every injury or illness. If you have been referred to your personal physician, a primary care physician or a specialty physician for a follow-up visit, please tell this physician about any new or ongoing problems.

Insurance plans vary and the physician(s) referred by the Emergency Department may not be covered by your plan. Please contact your insurance company to determine coverage and benefits available for follow-up care and referrals.

If you need additional assistance selecting a physician, contact the Endeavor Health Physician Referral and Class Registration Line at (630) 527-6363 or find a doctor online by visiting <a href="https://www.eehealth.org">www.eehealth.org</a>. Click on "Find A Doctor"

If you have behavioral health concerns or thoughts of harming yourself, contact the Linden Oaks Hospital Assessment and Referral Center at 630-305-5027. Staff are available 24 hours a day, 7 days a week.

If you have difficulty scheduling your follow-up appointment as directed, please call our Case Manager

Si tiene problemas para programar una cita de seguimiento según lo indicado, llame al Encargado de Caso

Edward Hospital Case Manager 630-646-8896 Elmhurst Hospital Case Manager 331-221-0198

If you have been prescribed any medication(s), please fill your prescription right away and begin taking the medication(s) as directed. If you have any difficulty obtaining the medication(s) prescribed from your Emergency Department visit, please call the Case Manager number listed above.

Our Emergency Department is dedicated to providing you with excellent care and a patient-centered experience. Feedback is appreciated, and can be communicated via the electronic (email/text) assessment survey that you will receive within 24 hours of your visit. Additionally, the Patient Experience Call Line is available 24 hours a day/7 days a week.

The EEHealth Patient Experience Call Line 331-221-1115

If there is any change or worsening of your condition, call your primary care physician or return to the Emergency Department.

## 12/09/2024 - ED in Edward Hospital Emergency Department (continued)

After Visit Summary (continued)

Cervical Strain, Understanding (English)

### **Understanding Cervical Strain**

There are seven bones (vertebrae) in the neck that are part of the spine. These are called the cervical spine. Cervical strain is a medical term for neck pain. The neck has several layers of muscles. These are connected with tendons to the cervical spine and other bones. Neck pain is often the result of injury to these muscles and tendons.

#### **Causes of cervical strain**

Different types of stress on the neck can damage muscles and tendons (soft tissues) and cause cervical strain. Cervical tissues can be damaged by:

- The neck being forced past its normal range of motion, such as in a car accident or sports injury
- Constant, low-level stress, such as from poor posture or a poorly set up workspace

#### Symptoms of cervical strain

These may include:

- Neck pain or stiffness
- Pain in the shoulders or upper back
- Muscle spasms
- Headache, often starting at the base of the neck
- Irritability, trouble concentrating, or sleeplessness
- Numbness in the arm or hand
- Tingling or weakness in the arm

### Treatment for cervical strain

This problem often gets better on its own. Treatments aim to reduce pain and inflammation and increase the range of motion of the neck. Possible treatments include:

• Changes to your posture or sleep positions. This can help ease muscle tension.
